

This Versatile Power Chair

Is Great For

Indoors & Outdoors or Fold it to Travel

The Freedom Chair is one of the lightest and most versatile power chairs in New Zealand today. It's your best choice for all round convenience and performance.

Driving the Freedom Chair is easy and fun. Simply press the power button on the Controller, set the speed and use the Joystick to move around. The Joy Stick controller manages speed, direction and braking.

Low speed is perfect for around the house or in buildings. Manoeuvring in passageways and through doors is easy and this also makes it safe for beginners to learn with confidence.

Medium speed is perfect for keeping pace with sidewalk traffic or a friend on foot.

In High, the Freedom Chair will take you up to 6.5kph

Indoors or out, on trains, planes, or automobiles, when it's time to go anywhere, there's no better travel companion than a Freedom Chair.

'FREEDOM CHAIR' A LIFE CHANGING EXPERIENCE.
